Art Unit: 1732

DETAILED ACTION

1. The rejection of claims 7-12 under 35 USC § 112, second paragraph, set forth in the previous Office Action (mailed on 20 September 2005) has been overcome and is withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4, 6-17 and 19-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Beebe et al (U.S. Patent 6,488,872 B1) for the reasons of record.

4. Claims 1, 2 and 6-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Kenis et al ("Fabrication Inside Microchannels Using Fluid Flow") for the reasons of record.

Response to Arguments

5. Applicant's arguments filed on 23 January 2006 have been fully considered but they are not persuasive.

6. Applicant argues (pages 7-9) that Beebe et al and Kenis et al do not teach each and every element of the claimed subject matter, particularly forming a structure attached to a microfluidic channel. Examiner responds that Beebe et al and Kenis et al do teach each and every element of the claimed subject matter, including forming a structure attached to a microfluidic channel (col. 11, line 66 to col. 12, line 14 of Beebe et al (hydrodynamic focusing using a hydrodynamically focused fluid and a focusing fluid); col. 7, lines 63-67 of Beebe et al (an anchoring monomer is adhered to a channel surface); page 842, second column, part III of Kenis et al (coatings on channels); pages 844-845 of Kenis et al (hydrodynamic focusing using a hydrodynamically focused fluid and a focusing fluid)).

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS

Art Unit: 1732

of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
